NEW FUTURES CONTRACT BASED ON STOCK INDEX

On October 28, 1977, the Kansas City Board of Trade announed a new futures contract based on a stock average, which was filed with the Commodity Futures Trading Commission for approval. This new concept offers hedging, or price protection, to persons and institutions with a position in stocks, and should also have attraction for speculators.

Pending CFTC approval of the contract, a date for commencement of trading cannot be set. Preliminary discussions with the CFTC, however, have been favorable, and public hearings were held October 25 and 26, 1978, where some 19 expert witnesses produced a 425 page transcript.

The contract was on the CFTC docket January 29, 1980, and is expected to be discussed at later meetings, with final action taken in 1980. This futures contract is under the exclusive jurisdiction of the CFTC, based on the Commodity Exchange Act.

To permit new traders to join the exchange who do not wish to trade wheat futures or cash grain, a new class of membership was authorized.

This stock index futures contract should become another financial tool for the financial community. It will have value for portfolio managers, block traders, market makers and specialists, underwriters, and others. This new development is indicative of a desire on the part of the Kansas City Board of Trade to further enhance the exchange's utility to the financial community and to its members. The contract is based on the Value Line Composite Average Index.

The 1979 Stock Index Futures Committee was comprised of J. F. Baumgartner, Chairman, Loren A. Brown, Jr., J. S. Geisel, Jr., Morton I. Sosland, G. K. L. Myers, R. H. Uhlmann, D. W. Gibson, R. B. Hartzell, and W. Michael Farmer, assisted by W. N. Vernon III, Executive Vice President of the Kansas City Board of Trade.
